

Here are the visual mockups for the key screens and reports of your **Software License Management System**. These images are designed to complement the PRD, giving your development team a clear visual reference for the user interface and data presentation.

1. Main Dashboard

This is the landing page for your administrators. It provides an at-a-glance view of the system's health, focusing on upcoming expirations and a breakdown of your software spend.

2. Software Inventory Screen

This screen is the central repository for all your software titles. It features a filterable list that visually distinguishes between active and decommissioned titles. The "Export to Excel" button is prominently displayed for easy reporting.

The screenshot shows the Software License Management System's Software Inventory page. The left sidebar has a dark theme with options: Dashboard, Software Inventory (which is selected and highlighted in grey), Vendors, Reports, and Admin Settings. The main content area has a light blue header bar with the title "Software License Management System" and a user profile for "John Doe (System Admin)". Below the header is a green button labeled "Export to Excel". The main content is titled "Software Inventory" and contains a table titled "All Software Titles". The table has columns: Title Name, Vendor, License Type, Status, Total Licenses, and Actions. There are three rows of data:

Title Name	Vendor	License Type	Status	Total Licenses	Actions
Adobe Creative Cloud	Adobe	Subscription	Active	150	View Details Edit
Old Accounting Software v2	Legacy Systems Inc.	Perpetual	Decommissioned	10	View Details Edit
Visual Studio Enterprise	Microsoft	Perpetual	Active	50	View Details Edit

3. License Details & History Screen

Clicking "View Details" on any software title takes you to this screen. It provides a complete history of all purchases and renewals for that title, including the PO Number, Cost Center, and a section to manage multiple file attachments (quotes, invoices, license keys).

The screenshot shows a web-based software license management system. The URL is https://localhost:3000/license/Details/Visual Studio Enterprise. The page title is "Software License Management System". The main content area is titled "Visual Studio Enterprise - Details". It has tabs for Overview, License History, Support Contracts, and Attachments. The License History tab is selected, showing two entries: "Initial Purchase" and "True-Up Purchase". The "Initial Purchase" entry includes details: Date: 2023-01-15, PO: PO-98765, Quantity: 50, Cost Center: IT-Dev, Cost: \$25,000. The "True-Up Purchase" entry includes details: Date: 2024-01-15, PO: PO-11223, Quantity: 10, Cost Center: IT-Dev, Cost: \$5,000. Below the License History is a section for "Current Assignments" which lists five server names: Server Name 1, Server Name 2, Server Name 3, Server Name 4, and Server Name 5. On the right side, there is an "Attachments" panel with a "Upload New File" button. It contains two attachments: "VS_Enterprise_Quote_2023.pdf" and "VS_Enterprise_License_Key.txt", each with a "Download" and a "Delete" button.

4. Report Export Screen

This is an example of a report generated by the system, such as the "Upcoming Expirations" report. It shows the data in a clean grid format, ready to be exported to Excel for sharing with Procurement or Finance teams.
